Ayanbiyi Ifeoluwa

Ibadan, Nigeria | +2349023586646 | ifeayanbiyi038@gmail.com

OBJECTIVE

My name is Ayanbiyi Ifeoluwa. I am a Full-Stack Engineer with a proven track record of building and shipping production web applications from scratch. I have engineered and deployed over 10 commercial platforms across FinTech, AI, and global E-commerce. I specialize in the modern JavaScript and Python ecosystems, managing everything from backend database infrastructure to responsive frontend user experiences. I am actively seeking full-time Full-Stack Developer or Software Engineer roles where I can deliver fast, scalable code for both local and international companies.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH) | Ogbomoso, Nigeria
Bachelor of Technology, Human Anatomy

EXPERIENCE

ZendSpeed – Full-Stack Engineer, Remote (United States)

Achievements

• Masterminded the complete end-to-end design and technical architecture of ZendSpeed Dental, delivering a premium, pixel-perfect aesthetic tailored for the competitive US market.
• Engineered an exceptionally smooth, custom booking and appointment management interface that directly drove a user acquisition surge of over 2k users.
• Created a highly responsive, mobile-first design architecture ensuring flawless interface consistency and layout execution across all desktop and mobile devices.
• Integrated the polished frontend design directly with a robust Python/Django and Node.js backend to ensure seamless data flows and low-latency interaction speeds.
• Oversaw the complete deployment pipeline, managing everything from initial visual mockups to active production deployment on high-performance cloud infrastructure.

Responsibilities

• Own the entire creative design system, user experience (UX) layouts, and full-stack technical infrastructure for core corporate assets.
• Write and maintain highly responsive, pixel-perfect user interfaces using HTML5, CSS3, Tailwind CSS, Next.js, and React.
• Build, scale, and optimize secure backend database relations and API workflows to support daily transaction systems and incoming user traffic.

Freelance & Contract – Full Stack Engineer, Remote

Achievements

- Run a highly active engineering practice, delivering over 10 complete web applications for international brands, startups, and founders.
- Masterminded and delivered the complete, end-to-end full-stack web architecture and design for the entire ZendSpeed corporate ecosystem, ensuring an elite, premium layout from scratch.
- Built Scutti, a Nigerian fashion commerce platform with product discovery, responsive storefront flows, and a structured shopping experience.
- Built Beauty by BYSS, a Nigerian beauty spa platform with treatment discovery, pricing, offers, and appointment paths.
- Developed Nuvelle Home, a high-volume US e-commerce furniture platform featuring deep product filtering and secure transactional workflows.

Responsibilities

- Consult directly with clients to map out product requirements, tech stacks, database schemas, and timeline scopes.
- Build, test, and deploy production-ready web applications across diverse frontend and backend environments.
- Manage application databases and state management using Supabase, Firebase, MySQL, and PostgreSQL.
- Designed the service architecture and customer journey for Beauty by BYSS, from treatment discovery through appointment intent.

Manchor – Software Engineer Intern

Achievements

- Supported frontend engineering systems using React and Tailwind CSS, contributing to faster feature delivery across projects.
- Contributed reusable UI components that reduced styling inconsistencies across the platform.
- Structured relational MySQL database work to support reliable daily user interactions.

Responsibilities

- Built responsive web layouts and interactive user dashboards.
- Assisted with application improvements and backend performance investigations.
- Participated in engineering sprints, feature scoping, and code reviews.

CERTIFICATIONS

Product Design (UI & UX) | TS Academy | 3-month training programme | Certified June 9, 2026
Credential ID: TS2BAB8DQ6LNUS
